Guides young people towards green professions at the University, in technical schools, and through self-learning in the Congo Basin; producer of films about these green professions respectful of the forest

### Education:

| Institution (Date from-Date to)                                                             | Degree(s) or Diploma(s) obtained                 |
|---------------------------------------------------------------------------------------------|--------------------------------------------------|
| Liège University Belgium ( 9 -1975 to 6- 1981)                                              | Doctor ( veterinary)                             |
| Liège University Belgium ( 2 -2002 to 6 -2004)                                              | Master                                           |
| Lubumbashi University, Agriculture Ministry<br>Kinshasa Administration National High school | Agronomy, rural development; (learning by doing) |

### Membership of professional bodies:

- General Manager of the European Economic club in Kinshasa, 2017- 2022. [cee\\_eba@yahoo.fr](mailto:cee_eba@yahoo.fr)
- Active participation in number of economic missions. <http://www.beltrade-congo.com/>
- Executive organizer of the economic Belgian week of Kinshasa, 2018-2022
- Past president of 2 Rotary clubs
- Consul of Norway and Denmark in RDC (1998-2001).
- Member of the EU DRC Task Force as part of the Global Gateway ( with the collaboration of the DRC National Agency for the Promotion of Investments)

### Key qualifications

Deep knowledge of the stakeholders, technical partners in D R Congo of the current agriculture and rural development and agro forest projects, connecting actors (producers and farming organizations, industrials and traders' associations), local communities and indigenous people. 40 years' experience in agriculture and livestock, agro business, local governance, community forest and biodiversity protection.

### Other skills: Microsoft office

Author :15 books, photograph, film maker [2050 Congo Solutions - YouTube](#)

**Present position:** managing director of the small expertise Belgian company “ 2050 Congo Solutions” since 6 years

**My approach :** Constantly building on my expertise working in the heart of Africa to preserve its identity, ecosystems, biodiversity and ... future, my actual missions promote the necessity of protecting the Congo basin forest and key natural areas as Virunga, Garamba, Salonga, Upemba Kundelungu, Luki and Yangambi biosphere by the way of people empowerment ; this job is done with communities working around because they need this access to natural resources and use it in a sustainable way ...Final objective is to preserve the Congolese forest and its biodiversity, such as the bonobo, whose DNA we share 98% of.

I seek to learn and work with people, how to co-exist in harmony alongside the forest, how to develop agricultural models with farmers that are more sustainable, environmentally-friendly, as well as being more economically viable.

This means that the local people can take charge of their own futures and fates in the knowledge that they have the tools, secure local governance and a harmonious participative community. I put my pictures, films and publications online to maximize the amount of people, especially the Congolese youth, that will see and hopefully be influenced by the work that I do, who will then want to also make a change by seeing what has been done here so far, and can then take the knowledge on themselves to make a difference in the future.

## Lasted and current activities & responsibilities in the Democratic Republic of Congo:

| Location                      | Dates                          | Experience                                                                                                                                                                                                                                                                                                                                                      |
